

Print Cylinders

RotoMetrics' Standard Aluminum, Feather-Lite and exclusive Hardcase™ Print Cylinders are all manufactured completely in-house to our exacting requirements on Computer Numeric Controlled (CNC) equipment — ensuring you of the greatest accuracy and consistency.

What's more, RotoMetrics guarantees diameters, taper and total indicator readout (TIR) all to be within or better than OEM specifications on every print cylinder we make.

Hardcase™ Print Cylinders

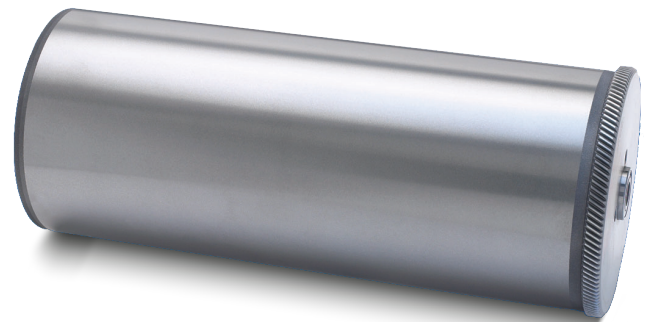

- Feature the exclusive RotoMetrics Hardcase coating to protect the cylinder from razor blade scratches, which can degrade printing capabilities over time.
- Provides a longer, more reliable service life compared to other print cylinders

Feather-Lite Print Cylinders

- Available at no extra charge
- Offer less bearing load and greater bearing life, thanks to their lighter weight
- Allow for one man make-ready
- Sizes start when standard rolls exceed 25 lbs (11 kg)

Standard Aluminum Print Cylinders

- Manufactured with high-quality bearings to ensure printing accuracy
- Features sealed bearings for maintenance-free performance

WHY TRUST ROTOMETRICS?

We are an “exact fit” to your distinct needs. We know your presses, your tools and your materials. We back every tool we sell with the full support of our technical experts, offering advice and insights customized to address your specific needs. RotoMetrics is the right choice.

Contact a RotoMetrics representative today to discuss how you can benefit and profit with the highest quality die cutting components offered.
