

Magnetic Cylinders

RotoMetrics' Magnetic Cylinders are available for virtually all types of label presses and converting machinery, allowing converters to use flexible dies in many different applications.

Features

- Drive gear included with each cylinder
- Superior magnetic strength (holding power); higher strength magnet configurations available based on the application
- Guaranteed precise tolerances on Total Indicator Reading (TIR) and bearer/body diameters
- Integral assembly for maximum durability and resistance to damage

Advantages

- On-file specifications, which makes ordering flexible dies fast and easy, and also ensures an exact cylinder clearance for consistent, predictable results
- On-staff technical support for recommendations on clearance, dimensional tolerances, plus other flexible die use suggestions

Why trust RotoMetrics?

We are an "exact fit" to your distinct needs. We know your presses, your tools and your materials. We back every tool we sell with the full support of our technical experts, offering advice and insights customized to address your specific needs. RotoMetrics is the right choice.

Contact a RotoMetrics representative today to discuss how you can benefit and profit with the highest quality die cutting components offered.

Flat Magnetic Bases

Designed for use with flexible dies in flat die-cutting systems, RotoMetrics' Flat Magnetic Bases are used for many applications, especially those involving intricate shapes. Our Flat Magnetic Bases also offer more accurate total die height (.0002" or 5 microns) compared to steel rule dies, giving you more consistent, level die-cutting results.
